DETAILED ACTION

Election/Restrictions

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

DETAILED ACTION

Election of Species

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I: drawn to a first level of security, employing an algorithm that changes value, where the algorithm is known to the user (e.g., a series of digits based on the hour, day, week year) (abstract and Fig. 6) and corresponding claims 3, 7, 13, 19, 23, 24, 27, 32, 34, 37, 41, 43, 46, 49, 52, 57, 62, and 65.
- Species II: drawn to a second level of security, which sends a security number to the user via a pager or phone, which they append to some portion of their PIN (abstract and Fig. 7) and corresponding claims 2, 6, 16, 17, 22, 26, 33, 38, 42, 51, 64, 66, and 67.
- Species III: drawn to a third level of security, which requires the user to interact with a series of predetermined questions (abstract and Fig. 8) and corresponding claims 4, 20, 28, 35, 44, 45, and 46.
- Species IV: drawn to a fourth level of security, which employs voice fingerprinting and voice pattern recognition (abstract and Fig. 9) and corresponding claims 8, 10, and 18.
